24/7 Security & Monitoring

WITH 365 Secure

365 Secure Elite provides threat detection and response capabilities; advanced account protection; proactive prevention of threats and attacks—reducing cost, minimizing damage and improving security An initial assessment of the user's security posture and setup of configuration best practices

WITHOUT 365 Secure

Talent and tech must be assembled to manage alert monitoring, analyze and detect threats, and perform response functions on an ongoing basis which can be costly and complex. Proper security configuration must be applied manually

Visibility

WITH 365 Secure

Live monitoring and alerts
- 24/7/365 identify threats Alerts are reviewed in 60 minutes or less with 365 Secure Elite
- Digestible incident and investigation reports for better insight into risks and user behavior

WITHOUT 365 Secure

No alerts are configured by default
Advanced knowledge of Microsoft audit logs is required to set up alerts

Improve Security

WITH 365 Secure

- Implement security best practices; detect and reduce vulnerabilities
- Respond to potential threats quickly

WITHOUT 365 Secure

- Extra security settings must be configured manually
- No central location for addressing security threats

365SECURE
Benefits

PROTECT YOUR BUSINESS FROM THREATS

Microsoft 365 is the most targeted platform for cyber crime due to its popularity. At the same time, roughly half of security breaches are in some way caused by human error. With 365 Secure Elite, our security team takes over monitoring and incident response for your Microsoft 365 tenants, and alerts you if further action is required.

KNOW WHAT'S HAPPENING IN THE WORKPLACE

365 Secure gives users visibility over how employees are using and sharing sensitive data stored in Microsoft 365. Additionally, users can review vulnerabilities, security incidents and flagged threats in order to take preventative or corrective action.

PREVENT DATA EXFILTRATION

365 Secure blocks unauthorized transfers of sensitive information from your organization, whether by an external attacker or inside actor, malicious or otherwise. This stops data breaches from happening, keeps customer data protected and helps your business maintain compliance with data privacy and protection rules and regulations.

BE PROACTIVE

With constant monitoring, alerts and reporting, 365 Secure users don't have to wonder about what's happening in their environment. 365 Secure addresses vulnerabilities before they're exploited, allowing users to adopt a proactive approach to Microsoft 365 security.

FAQs

Does 365 Secure replace Microsoft 365's security features, tools and products?

No, 365 Secure doesn't replace security features, tools and products provided by Microsoft. Instead, the 365 Secure Core software simplifies Microsoft 365 security and makes it easier for businesses to protect themselves from potential breaches. The service component of 365 Secure under the Elite plan, on the other hand, equips you with proactive threat detection and response powered by our in-house cybersecurity experts, making the overall productivity suite more secure.

Does 365 Secure interfere with Microsoft's security tools and products or other third-party security products?

No! Built SMB and IT limited clients, 365 Secure does not interact or interfere with additional security measures that users may have implemented.
